

Name \_\_\_\_\_

**Worksheet 1B:** Using the QuickTime movie on the course website, complete this topographic by sketching in the general shape of the contour (the shoreline around the flooded hill) at each step in the movie. To get you started, the first two (lowest) contours are shown below. Your contours may not be this detailed, but should show the shape of the hills as accurately as possible. Number each contour, as shown for the first two lines.
